

ICT IN THE CLASSROOM

Supports Collaboration

Collaborative learning is a social experience for students. ICT enhances this through promoting the creation of goals, delegation of work and art of negotiating.

Motivates the Mind

ICT tools stimulates the growth of the imagination of students. ICT encourages students to explore, challenge and connect with real world topics.

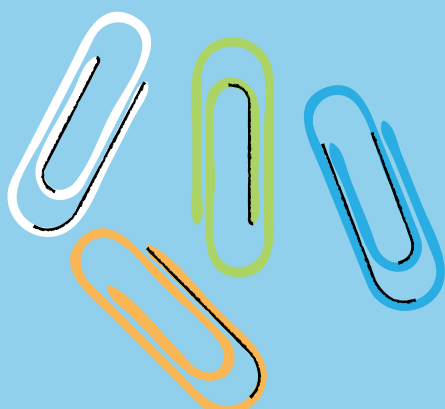

Student Focused

ICT endorsees student voice. This encourages leadership, advocacy and individuality. ICT makes education more accessible and inclusive for all students.

Future Proofing

ICT supports work and community based learning for students in their preparation for life after second level schooling.
